

## Tape Application Tools „Lamination“

### TAT CL400 CONTINUOUS LAMINATOR

maximum tape width: 25 mm (adjustable)  
height: adjustable

right: application direction from left to right,  
working direction from right to left

left: application direction from right to left,  
working direction from left to right  
maximum panel width:

### TAT LL300-2T/3T/4T LINEAR LAMINATOR

maximum tape width: 25 mm (adjustable)  
panel height: from 5 up to 45 mm (adjustable)

right: application and working direction from left to right  
left: application and working direction from right to left

maximum panel width:

2T: fits for panels of max. 2000 mm in width  
3T: fits for panels of max. 3000 mm in width  
4T: fits for panels of max. 4000 mm in width

### TAT HL200 HAND LAMINATOR

maximum tape width: 25 mm (adjustable)  
panel height: from 6 up to 125 mm (adjustable)

application and working direction  
from left to right

*Special solutions are available on request.*

## Tape Application Tools „Pressing“

### TAT HP200 HAND PRESSER

for pressing of panel and frame  
maximum total height: 130 mm  
working direction: from left to right

maximum pressure: 400 N  
standard range of pressure: 0-40 mm  
(measured from the edge)

*Special solutions are available on request.*

### Applications:

- Structural Glazing
- Automotive Industry
- Solar panels
- Signing elements
